IGROW SUCCESS MASTERS ACADEMY

Career Compass Report

Pilot Psychometric Career Assessment & Planning · Class 12 — Course + College + Entrance Exam + Career Roadmap

Student **Kavin Raj**	Class **12 · Science – PCB**	School **Sample Senior Secondary School**
Board **CBSE**	Assessment date **5 October 2026**	Assessment ID **IGCC-DEMO-KAVIN**

1 Executive Summary

TOP APTITUDES	INTEREST CODE	TOP VALUES	PLAN A CAREER
Verbal · Logical	**SIA — Helper / Thinker**	**Service & Social Impact · Intellectual Challenge**	**Psychology / Counselling Careers**

Kavin, your results show someone who is naturally attracted to teaching, caring for, guiding and supporting people, with real strength in verbal reasoning. You come across as considerate, cooperative and team-minded, and what you want most from your future work is service & social impact and intellectual challenge.

YOUR CAREER EXPLORATION CLUSTER

Psychology / Counselling Careers | Teacher / Educator / Learning Designer

These two careers fall within a 2-point Compatibility Index range (81–83). The assessment cannot reliably distinguish among them at this level, so treat them as **equally strong options to explore**, not as a ranking. Short projects, talks with professionals and job-shadowing are the best way to choose between them.

Your strongest career matches

#	Career	Compatibility Index	Recommendation	Confidence

1	**Psychology / Counselling Careers** Medicine & Healthcare	**83**/100 Strong Fit	Strong Candidate	Preliminary High
2	**Teacher / Educator / Learning Designer** Education	**81**/100 Strong Fit	Strong Candidate	Preliminary High
3	**Doctor (MBBS)** Medicine & Healthcare	**80**/100 Strong Fit	Strong Candidate	Preliminary High
4	**Nursing Professional** Medicine & Healthcare	**78**/100 Good Fit	Good Candidate	Preliminary High
5	**Social Worker / Development Professional** Social Sciences & Humanities	**76**/100 Good Fit	Good Candidate	Preliminary High

Plan A: Psychology / Counselling Careers · **Plan B:** Teacher / Educator / Learning Designer · **Plan C:** Social Worker / Development Professional

2 How to Read This Report

The assessment has **8 sections covering 9 scoring components** (personality and work style share one section but are scored separately). Career recommendations combine seven areas: aptitude, interests, personality & work style, values, motivation, skills & confidence and EQ/social fit, never a single score. **Learning preferences** are used to personalise your study and development advice, not to choose careers. Your **marks** and your **current stream** are assessed separately as academic and pathway compatibility.

The **Career Compatibility Index** is an internally weighted compatibility score. It is not a percentile, a probability of success or a nationally normed score. Matches within 2 points of each other should be treated as equally strong.

- **It shows possibilities, not limits.** Abilities, skills and confidence all grow with practice.
- **Aptitude ≠ intelligence, and interest ≠ ability.** They are measured separately because they are different things.
- **Scores are indicative.** Aptitude is shown in bands (Very Strong, Strong, Moderate, Developing), because each area has 8 questions. Other scores are on a 0–100 scale relative to your own answers. None of them are national percentiles. This is a **pilot assessment**: iGrow is collecting data to build Indian norms and validate the model.
- **Labels describe tendencies.** "Developing" means room to grow, not a weakness.
- **Use it in conversation.** It works best when discussed with an iGrow counsellor and your family.

This report was generated by the iGrow Career Compass, an original assessment developed by iGrow Success Masters Academy. It is a pilot guidance tool that has not yet completed validation studies, and its scores are not nationally normed. It should be interpreted with a qualified career counsellor and is not a clinical or diagnostic instrument. Course, exam and college details change every year: verify them with official sources. © 2026 iGrow Success Masters Academy · igrow@successmastersacademy.in · 9994942763

3 Aptitude Profile

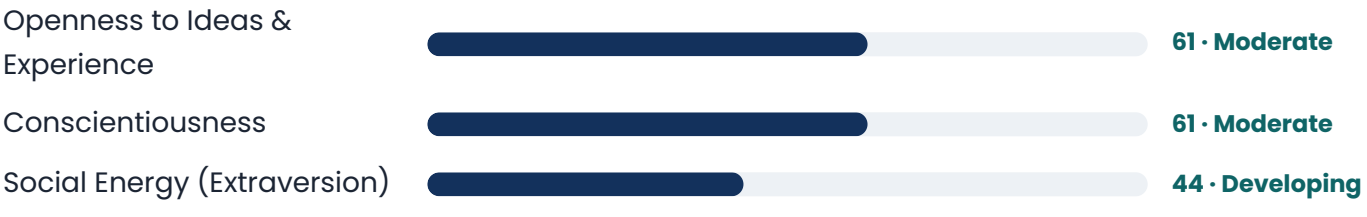
Aptitude is your potential to learn and reason in an area. It is different from what you already know (achievement) and from general intelligence.

Overall aptitude: 38 of 56 correct (Strong). Each area has 8 questions, so treat each band as a broad indication rather than a precise measurement.

Area	What it measures	Where it matters
Verbal Reasoning	Understanding words, meanings and written arguments	Law, media, humanities, management, civil services and any role that relies on reading and writing well
Logical & Analytical Reasoning	Following rules, sequences and arguments to a sound conclusion	Coding, law, research, consulting, problem solving in any field
Data Interpretation	Reading tables and charts and drawing correct conclusions	Analytics, finance, research, management, policy, science

4 Personality Profile

Based on the Big Five model of personality, described in career language. No result here is good or bad; every pattern has careers where it is an advantage.



What this means for you

- **Openness to Ideas & Experience:** You tend to be curious, imaginative and drawn to new ideas.
- **Conscientiousness:** You tend to be organised, dependable and goal-focused.
- **Social Energy:** You show a balance: energised by people in some situations and energised by focused in others.
- **Cooperation:** You tend to be considerate, cooperative and team-minded.
- **Emotional Steadiness:** You tend to be calm and steady under pressure.

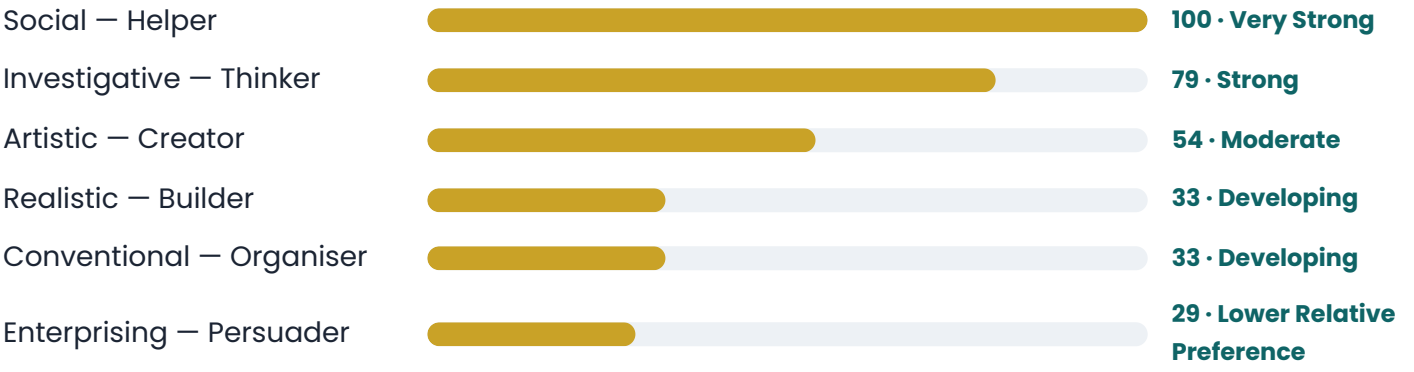
> Your profile suggests you may do your best work with time to prepare, focused tasks and meaningful one-to-one interaction. Many careers, including people-facing ones, have roles that fit this style well, such as research, advisory, analytical and specialist roles.

Work style

- Works best with clear rules and plans
- Starts things without being asked
- Keeps going long after others stop
- Adjusts easily when plans change
- Does best work with others
- Prefers safer, proven options

5 Career Interest Profile

Based on Holland's RIASEC framework of vocational interests. Interest shows what you enjoy, not what you can or cannot do.



You are naturally attracted to **teaching, caring for, guiding and supporting people**, and also to **questioning, researching, analysing and solving complex problems**. You will likely enjoy settings such as schools, hospitals, NGOs, counselling and community settings.

Top interest areas

- Social — Helper
- Investigative — Thinker

Lower relative preference

- Conventional — Organiser
- Enterprising — Persuader

Secondary

- Artistic — Creator
- Realistic — Builder

6 Emotional Intelligence

EQ is not a fixed score. It is a set of skills that grow with practice and reflection. It is used here for personal development and is never used on its own to rule out a career.

Overall EQ (situational judgement) — **97 · Very Strong**

Strengths

- Emotional regulation
- Empathy
- Social awareness
- Relationship management

Areas to practise

- Keep practising: no major gaps showed up

7 Values

What matters most to you

- **Service & Social Impact**: helping people or improving society
- **Intellectual Challenge**: solving difficult, challenging problems
- **Work–Life Balance**: having enough time for family and hobbies
- **Creativity**: creating original things or ideas

Less important to you right now

- Leadership
- Adventure & Variety
- Entrepreneurship

Careers that honour your top values tend to feel meaningful for longer. Values often shift between ages 15 and 25, so revisit this every year.

8 Motivation

Your main motivation drivers

Mastery — **100 · 4 of 4 times offered**

Contribution — **100 · 4 of 4 times offered**

Less of a driver for you right now (not chosen when offered): Achievement, Autonomy, Recognition, Financial Reward, Security, Competition. This is not a weakness; it simply shows what energises you less at

present.

You are most energised by **becoming truly skilled and understanding deeply** and **making a difference for people or a cause**. When study or work connects to these drivers, you are more likely to persist through difficult phases like entrance preparation.

9 Learning Preferences

These are preferences, not fixed "learning styles". Research shows everyone benefits from mixing methods. Use your preferences to stay engaged, not to avoid other approaches.

- **Reading**: Use textbooks and summaries; write short notes in your own words.
- **Discussion**: Form a study group and teach topics to each other.
- **Examples**: Study solved examples first, then attempt similar problems.
- **Demonstration**: Watch a demo or video, then repeat the steps yourself.

10 Skills & Self-Efficacy

Current skill (what you can do now), aptitude (your potential) and confidence (how sure you feel) are different things. The gaps between them are useful to know about.

Skill	Current level	Confidence	Related aptitude
Everyday communication	100	100	88
Mathematics	25	25	63
Technology & computers	25	25	63
Creativity	50	50	—
Leadership	50	50	—
Teamwork	100	100	—
Writing	75	75	88
Public speaking	75	75	—
Research	75	100	75
Problem solving	50	50	75
Organisation & planning	75	75	—
Entrepreneurship	25	25	—
Digital & online tools	50	50	—

Hidden strengths: your aptitude in mathematics and technology & computers is higher than your confidence. You may be more capable than you think.

11 Integrated Career Profile

Bringing your psychological profile together, your profile points most strongly toward **Medicine & Healthcare, Education and Social Sciences & Humanities**. Your top matches combine your verbal reasoning, your social interests and your wish for service & social impact.

Career Compatibility Index weights (initial pilot model, to be refined through validation): Aptitude 25%, Interest 25%, Personality & work style 15%, Values 10%, Motivation 10%, Skills & confidence 10%, EQ/Social 5%. Learning preferences are not included. Academic compatibility and pathway compatibility are reported separately for every career.

The **Career Compatibility Index** is an internally weighted compatibility score. It is not a percentile, a probability of success or a nationally normed score. Matches within 2 points of each other should be treated as equally strong.

12 Top 10 Career Recommendations

#	Career	Index	Academic	Pathway	Recommendation
1	**Psychology / Counselling Careers** Medicine & Healthcare	**83** Top cluster	Strong	Strong	Strong Candidate
2	**Teacher / Educator / Learning Designer** Education	**81** Top cluster	Strong	Strong	Strong Candidate
3	**Doctor (MBBS)** Medicine & Healthcare	**80** Adjacent match	Strong	Strong	Strong Candidate
4	**Nursing Professional** Medicine & Healthcare	**78** Adjacent match	Strong	Strong	Good Candidate
5	**Social Worker / Development Professional** Social Sciences & Humanities	**76** Adjacent match	Strong	Strong	Good Candidate
6	**Physiotherapist / Sports Rehab** Medicine & Healthcare	**75** Adjacent match	Strong	Strong	Good Candidate

7	**Environmental / Sustainability Scientist** Emerging Agriculture & Environment	**73** Adjacent match	Strong	Strong	Good Candidate
8	**Pharmacist / Pharma Research** Medicine & Healthcare	**71** Adjacent match	Strong	Strong	Good Candidate
9	**Journalist / Content Writer** Media & Communication	**71** Adjacent match	Strong	Strong	Good Candidate
10	**Biotechnologist / Genomics Scientist** Emerging Medicine & Healthcare	**69** Adjacent match	Strong	Strong	Worth Exploring

Also showed a good fit but need a different Class 12 stream: Economist / Policy Analyst (68), Renewable Energy & Climate-Tech Engineer (67), AI / Machine Learning Engineer (60), Cybersecurity Specialist (60). Ask your counsellor about related routes after graduation.

Top cluster: within 2 points of your highest match. **Adjacent match**: within 2 points of another strong match, but further from the top.

How to explore your cluster

A score can narrow the options; only real experience can choose between them. Over the next 2–3 months, work through these steps for **Psychology and Teacher**.

1. **Look closely.** Watch two "day in the life" videos for each career. Note one thing that excites you and one thing that puts you off.
2. **Ask a professional.** Have a 15-minute conversation with someone in each field. iGrow can help with introductions.
3. **Try it.** Do one short hands-on task per career, such as a free online module, a mini-project, a workshop or a competition, then rate how much you enjoyed it from 1 to 10.
4. **Compare and decide.** Bring your ratings and notes to your iGrow counsellor. The career you kept wanting to do more of is usually the right Plan A.

13 Top 5 Career Deep Dive

Verify current eligibility, dates, syllabus and exam rules on the official examination authority's website before applying.

Match #1 · Medicine & Healthcare

Psychology / Counselling Careers

Strong Candidate **Preliminary High**

CAREER COMPATIBILITY INDEX	ACADEMIC COMPATIBILITY	PATHWAY COMPATIBILITY
83/100	**Strong**	**Strong**
Strong Fit	from your marks	stream & subjects

PROFILE CONVERGENCE	RECOMMENDATION CONFIDENCE	OVERALL RECOMMENDATION
High	**Preliminary High**	**Strong Candidate**
how many areas agree	until Indian norms are built	part of your top cluster

Dimension	Your score	Career needs	Fit
Aptitude	82	Verbal, Logical, Data	Excellent
Interest	86	Social, Investigative, Artistic	Excellent
Personality & work style	63	Higher Cooperation, Higher Openness to Ideas & Experience, Higher Emotional Steadiness, Decision style	Good
Values	84	Service & Social Impact, Intellectual Challenge, Independence	Excellent
Motivation	100	Contribution, Mastery	Excellent
Skills & confidence	87	Everyday communication, Research, Writing	Excellent
EQ / social fit	79	People-intensive	Excellent

Why it fits you

- **Aptitude:** you did well in Verbal Reasoning (very strong), Logical & Analytical Reasoning (strong) and Data Interpretation (strong), which this career uses daily.
- **Interest:** Social, Investigative and Artistic activities are among your top interests, and they are central to this work.
- **Personality:** your cooperation, openness to ideas & experience and emotional steadiness suit how this work is done.
- **Values:** you said service & social impact, intellectual challenge and independence matter to you, and this career offers that.
- **Motivation:** you are driven by making a difference for people or a cause and becoming truly skilled and understanding deeply, which this field rewards.

What may be challenging

- No major mismatches. The main challenge will be consistent preparation and building real-world exposure.

Subjects (Class 11–12)

Psychology (if offered), Biology or Sociology helpful; any stream

Courses

- **BA / B.Sc Psychology**: 3–4 yrs · Any stream
- **MA / M.Sc Psychology; for clinical practice, the RCI-regulated M.A. Clinical Psychology, introduced from academic year 2025–26 as the revised clinical psychology pathway**: 2 yrs · After graduation; verify the currently applicable RCI-approved route before admission

Primary entrance routes

- CUET-UG
- University entrance tests

Skills to build

- Everyday communication
- Research
- Writing

Entrance pathways

Exam / route	What it opens	Pathway
CUET-UG	Psychology programmes at participating universities, subject to each university's programme-specific eligibility and subject requirements	Direct
University entrance tests	BA / B.Sc Psychology at Christ, Symbiosis and others	Direct
RCI-regulated MA Clinical Psychology (after graduation)	RCI registration for clinical practice	Long-term

College strategy

Dream

- Top DU colleges (CUET-UG)
- Ashoka University
- Christ University

Target

- Madras Christian College
- Symbiosis
- Central universities via CUET-UG

Backup

- UGC-recognised state-university programmes (plan for an RCI-recognised PG later)

Focus your energy on **Target** institutions, keep one or two **Dream** applications as stretch goals, and secure at least two **Backup** options.

Budget note: prioritise government and aided institutions, central / state scholarships and institute fee waivers. Check total costs (fees + hostel) before applying to private or deemed universities.

What to do in Class 12

- Lock your exam calendar: CUET-UG, University entrance tests
- Shortlist Dream / Target / Backup colleges and track application deadlines
- Finish a portfolio, statement or interview preparation where needed
- Line up scholarships and a Plan B application in parallel

Long-term outlook

Rising awareness of mental health; clinical practice needs RCI-recognised postgraduate training.

Career-path note: "Psychology / Counselling Careers" covers several different roles, and a psychology degree alone does not make someone a professional psychologist. A psychology degree (BA / B.Sc) is the first step. Counselling roles usually need a master's in psychology or counselling plus supervised practice. Clinical psychology is a regulated professional pathway with specific postgraduate training and registration requirements: it needs the RCI-regulated M.A. Clinical Psychology (introduced from academic year 2025–26) and registration with the Rehabilitation Council of India before you can practise. Confirm the current requirements before choosing a programme.

Match #2 · Education

Teacher / Educator / Learning Designer

Aptitude	82	Verbal, Logical, Data	Excellent
Interest	79	Investigative, Social, Realistic	Excellent
Personality & work style	71	Higher Conscientiousness, Higher Emotional Steadiness, Higher Cooperation, Persistence	Good
Values	75	Service & Social Impact, Recognition & Prestige, Intellectual Challenge	Excellent

Motivation	100	Contribution, Mastery	Excellent
Skills & confidence	78	Research, Everyday communication, Problem solving	Excellent
EQ / social fit	79	People-intensive	Excellent

Why it fits you

- **Aptitude:** you did well in Verbal Reasoning (very strong), Logical & Analytical Reasoning (strong) and Data Interpretation (strong), which this career uses daily.
- **Interest:** Investigative and Social activities are among your top interests, and they are central to this work.
- **Personality:** your conscientiousness, emotional steadiness, cooperation and persistence suit how this work is done.
- **Values:** you said service & social impact and intellectual challenge matter to you, and this career offers that.
- **Motivation:** you are driven by making a difference for people or a cause and becoming truly skilled and understanding deeply, which this field rewards.

What may be challenging

- Entry is highly competitive and preparation is long, so a well-planned Plan B is essential.

Subjects (Class 11–12)

Physics, Chemistry, Biology

Courses

- **MBBS**: 5.5 yrs incl. internship · PCB with English; minimum marks and NEET-UG qualification

Primary entrance routes

- NEET-UG

Skills to build

- Research
- Everyday communication
- Problem solving

Entrance pathways

Exam / route	What it opens	Pathway
NEET-UG	MBBS at AIIMS, JIPMER and all medical colleges (MCC all-India & state quota counselling)	Direct

College strategy

Dream

- AIIMS New Delhi and other AIIMS
- JIPMER Puducherry
- CMC Vellore (NEET + own selection process)

Target

- Government medical colleges via state-quota counselling (e.g. Madras Medical College, Stanley)
- Other government colleges via MCC All-India Quota

What to do in Class 12

- Lock your exam calendar: NEET-UG
- Shortlist Dream / Target / Backup colleges and track application deadlines
- Finish a portfolio, statement or interview preparation where needed
- Line up scholarships and a Plan B application in parallel

Backup

- Private / deemed medical colleges (check fees carefully)
- If MBBS seat is not secured: BDS, BPT, B.Sc Nursing, Allied Health

Focus your energy on **Target** institutions, keep one or two **Dream** applications as stretch goals, and secure at least two **Backup** options.

Budget note: prioritise government and aided institutions, central / state scholarships and institute fee waivers. Check total costs (fees + hostel) before applying to private or deemed universities.

Long-term outlook

Respected and stable, but very long training (MBBS + PG). Seat competition is intense.

- Lock your exam calendar: CUET-UG
- Shortlist Dream / Target / Backup colleges and track application deadlines
- Finish a portfolio, statement or interview preparation where needed
- Line up scholarships and a Plan B application in parallel

Long-term outlook

NGOs, CSR, government schemes and international development organisations.

14 Stream Review

You are in **Science – PCB (Physics, Chemistry, Biology)**. Your strongest matches that are directly open from this stream are:

- Psychology / Counselling Careers (83)
- Teacher / Educator / Learning Designer (81)
- Doctor (MBBS) (80)
- Nursing Professional (78)
- Social Worker / Development Professional (76)

In Class 12 your stream is fixed. The focus now is choosing the right course and preparing for entrance exams. Many careers (law, design, management, media, psychology, civil services) are open from every stream.

15 Recommended Subjects

- Psychology (if offered), Biology or Sociology helpful; any stream
- Subjects you would like to teach
- Physics, Chemistry, Biology
- Physics, Chemistry, Biology, English
- Sociology, Psychology, Political Science

Students who take **Mathematics** in Classes 11–12 have additional options in fields such as economics, data science and finance. Some of these routes may still be reached later through bridge courses or programmes that do not require Class 12 Mathematics; check each programme's eligibility.

16 Course Recommendations

Course	Duration	Eligibility	Leads to

BA / B.Sc Psychology	3–4 yrs	Any stream	Psychology / Counselling Careers
MA / M.Sc Psychology; for clinical practice, the RCI-regulated M.A. Clinical Psychology, introduced from academic year 2025–26 as the revised clinical psychology pathway	2 yrs	After graduation; verify the currently applicable RCI-approved route before admission	Psychology / Counselling Careers
Integrated Teacher Education Programme (ITEP)	4 yrs	Class 12; via NCET	Teacher / Educator / Learning Designer
Graduation + B.Ed	3 + 2 yrs	Any stream	Teacher / Educator / Learning Designer
MBBS	5.5 yrs incl. internship	PCB with English; minimum marks and NEET-UG qualification	Doctor (MBBS)
B.Sc Nursing	4 yrs	PCB with English	Nursing Professional
BSW / BA Sociology	3 yrs	Any stream	Social Worker / Development Professional
MSW	2 yrs	After graduation	Social Worker / Development Professional

17 Entrance Examination Roadmap

Verify current eligibility, dates, syllabus and exam rules on the official examination authority's website before applying.

Most UG entrance exams run between December and June. Register early and track official notices.

Direct: leads straight into the course for that career. **Related**: a strong foundation route into the field. **Alternative**: a different route to a similar outcome. **Long-term**: taken after graduation.

Exam / route	What it opens	Pathway	Relevant for

CUET-UG	Psychology programmes at participating universities, subject to each university's programme-specific eligibility and subject requirements	Direct	Psychology / Counselling Careers
University entrance tests	BA / B.Sc Psychology at Christ, Symbiosis and others	Direct	Psychology / Counselling Careers

CTET / TNTET (after B.Ed)	Teacher eligibility	Long-term	Teacher / Educator / Learning Designer
CUET-PG (TISS) / MSSW entrance (after graduation)	MSW / MA Social Work	Long-term	Social Worker / Development Professional

18 College Strategy

Choose colleges using **course quality, accreditation (NAAC / NBA / professional councils), faculty, placements, fees, location, internships and research opportunities**, not ranking alone. Use NIRF as a starting point and check each institution's official site.

ACADEMIC & APTITUDE PLANNING INDICATOR	LATEST MARKS	BUDGET	LOCATION
77/100	**83%**	**₹1–3 lakh / year**	**Within my state**

This indicator combines your reported marks (60%) with your assessment performance (40%) for planning purposes only. It is **not** an admission probability, a percentile or a prediction of entrance-exam performance. Admission is usually decided by entrance exam results.

For your Plan A: Psychology / Counselling Careers

Dream

- Top DU colleges (CUET-UG)
- Ashoka University
- Christ University

Target

- Madras Christian College
- Symbiosis
- Central universities via CUET-UG

Backup

- UGC-recognised state-university programmes (plan for an RCI-recognised PG later)

Focus your energy on **Target** institutions, keep one or two **Dream** applications as stretch goals, and secure at least two **Backup** options.

Budget note: prioritise government and aided institutions, central / state scholarships and institute fee waivers. Check total costs (fees + hostel) before applying to private or deemed universities.

19 Plan A · Plan B · Plan C

PLAN A — Primary path

Psychology / Counselling Careers

Index 83 · Strong Candidate

Your best overall fit. Put most of your preparation energy here.

Course: BA / B.Sc Psychology
Primary routes: CUET-UG, University entrance tests

PLAN B — Closely related

Teacher / Educator / Learning Designer

Index 81 · Strong Candidate

Strong alignment with overlapping subjects and preparation, so effort for Plan A also counts here.

Course: Integrated Teacher Education Programme (ITEP)
Primary routes: NCET, CUET-UG

PLAN C — Flexible backup

Social Worker / Development Professional

Index 76 · Good Candidate

A different route that stays open from most streams and keeps your future options wide.

Course: BSW / BA Sociology
Primary routes: CUET-UG

A backup career is not a "lesser" career. It is a strategically chosen alternative that still fits who you are.

20 12–24 Month Action Plan

This month
Build a single calendar of entrance exams, registration dates and board exams. Register for every exam on your Plan A and B lists.

Next 2–3 months
Weekly mock tests with error analysis. Finish your portfolio, SOP or interview preparation. Research scholarships (NSP, state schemes, institute aid).

Exam season
Protect sleep and health. Take each exam, then reset. Don't over-analyse one paper.

Results & counselling
Compare offers on course fit, accreditation, outcomes and total cost. Use the counselling process specified by each course and institution (for example CUET, MCC, state counselling or university-specific counselling) carefully, and keep Plan B and C applications live.

Before college starts
Begin a bridge course or skill (coding, writing, design tools, Excel). Connect with seniors from your chosen college.

21 Skills Development Plan

Skill	Now	How to build it
Everyday communication	100	Join a debate, MUN or speaking club. iGrow's Talkative Club and Break The Ice programme build this fast.
Research	75	Pick one question a month and write a one-page research summary with sources.
Organisation & planning	75	Use a weekly planner and review it every Sunday.
Teamwork	100	Volunteer for group projects and reflect on what helped the team.
Problem solving	50	Solve logic puzzles, case studies or coding challenges every week.

22 Parent Guidance

What this assessment means: it is a structured picture of your child's abilities, interests, personality and values today, and of the careers where these come together. **What it**

does not mean: it is not a verdict on intelligence, a guarantee of success or a reason to rule out a dream. It is a starting point for good conversations.

How you can help

- Discuss strengths before gaps. Start with what your child does well.
- Encourage experiments: short courses, internships, workshops and talking to professionals.
- Weigh aptitude, interest *and* academic performance together.
- If you disagree with your child's preference, ask "What draws you to it?" before giving your view.
- Use the Plan A / B / C structure to reduce anxiety for everyone.
- Book a joint session with an iGrow counsellor to talk through differences.

What parents should NOT do

- Do not compare your child with siblings or cousins
- Do not force Science because of social pressure
- Do not select a career only because of salary
- Do not treat these results as destiny
- Do not ignore your child's interests
- Do not make decisions from a single score

23 Student Action Checklist

☐ Read this report and highlight three things that surprised you

☐ Discuss it with your parents and an iGrow counsellor

☐ Research Psychology / Counselling Careers: talk to at least one person working in it

☐ Write down your Plan A, B and C exam list with dates

☐ Pick one skill from Section 21 and practise it every week

☐ Start a simple portfolio or learning log

☐ Revisit this plan in 6 months
